Experience

Deriv Dubai, UAE
AI Engineer Feb. 2025 – Present

- Built a multi-agent outreach system that researches partners and personalizes messaging, handling **20K+ monthly investigations** across **228K+ mapped accounts**.
- Developed an always-on internal AI agent using **LangGraph and Deep Agents**, with persistent memory to investigate performance, prioritize partners and coordinate manager follow-ups.
- Built a PPC agent automating campaign creation, creative generation and optimization via **Google Ads/Meta APIs**; integrating Google Meridian for Bayesian marketing mix modeling.
- Enabled partners to query business data in plain English through a **retrieval-augmented analytics service** using Google ADK, Weaviate and partner-scoped SQL.
- Owned a React/Python analytics platform used by **100+ internal users** to analyze **13M+ rows**, with XGBoost models for churn and growth.
- Engineered **durable agent execution** with PostgreSQL checkpoints, sandboxed Python and restart recovery, plus idempotent agent-to-agent APIs for long-running tasks.

Impiger Technologies Dubai, UAE
QA Analyst & Tester Jun. 2023 – Aug. 2023

- Tested the **Sun NXT streaming app** across devices through functional, performance and exploratory testing; reproduced defects and verified fixes with engineers.

Selected Projects

verd — Multi-model code review Mar. 2026
GitHub | PyPI | Technical write-up

- Published a Python code-review tool where LLM reviewers challenge each other's findings before a judge consolidates results; supports CLI, MCP and Slack.
- Scored **40.0% F1 vs. 29.2% for Claude Opus 4.6** in a self-run evaluation on **50 pull requests** from the Martian Code Review Benchmark.

magenta-wsp — Weight-space programming Nov. 2026
GitHub | Interactive demo | Technical write-up

- Steered Magenta RealTime 2 from piano to flute by editing **0.032% of weights**, without retraining.

Open Source Contributions

Personal use of Hermes Agent and study of agent harnesses led to these upstream contributions.

- Contributed merged fixes with regression tests to **oMLX** (LLM/VLM inference cleanup) and **CloakBrowser** (iframe scoping and GeoIP timeouts).
- Fixed duplicate Telegram stream output in **GenericAgent**; added global instruction-file fallback to **Codewhale**'s Rust coding-agent runtime.

Technical Skills

Languages: Python, SQL, TypeScript/JavaScript
AI & ML: Google ADK, LangGraph, Deep Agents, RAG, Weaviate, MCP, Langfuse, XGBoost
Web & Data: FastAPI, Flask, React, PostgreSQL, BigQuery
Infrastructure: AWS ECS, GCP, Docker, Terraform, GitHub Actions

Education

BITS Pilani Sep. 2021 – Jul. 2025
Bachelor of Engineering, Computer Science | CGPA: 8.0/10
Professional Assistant, Digital Design Lab (Sep.–Dec. 2024): Led Verilog/FPGA labs.
