Experience

Applied AI Engineer Feb. 2025 – Present
Deriv *Dubai, UAE*

- Engineered an autonomous outreach system that segments **182K** partner accounts by lifecycle stage, researches each account, and decides whether and how to engage. Re-engaged partners recorded **94% higher** client trading volume and **79% higher** commissions; impact was validated via a randomized production holdout.
- Built an agentic analytics platform with **Google ADK** that generates governed SQL and runs sandboxed **Python** across hundreds of warehouse tables; added **Weaviate** retrieval, temporal memory, **Langfuse**-traced evals, and a typed agent-to-agent API for Slack and downstream production agents.
- Owned and productionized an affiliate analytics platform (**React**, **Flask**, **Supabase**) over **13M+** rows, adopted by **100+** users across growth, finance, and compliance. Cut recurring analysis from weeks to seconds and deployed **XGBoost** churn/growth classifiers with LLM-powered regional intelligence.
- Built a **LangGraph** pipeline for intraday gold/silver signals with false-positive guardrails and English–Arabic delivery via Telegram to **100+** VIP affiliates.

QA Analyst & Tester Jun. 2023 – Aug. 2023
Impiger Technologies *Dubai, UAE*

- Designed and maintained **700+** functional, performance, and exploratory test cases for a large-scale streaming application across multiple devices, partnering with engineers to identify critical defects and protect release stability.

Projects

verd | pypi.org/project/verd | *Python, Multi-LLM, MCP, Slack, PyPI* Mar. 2026 – Present

- Published a multi-LLM code-review debate engine as a Python CLI, **MCP** server for Claude Code/Cursor, and Slack bot; scored **40.0% F1** on the Martian Code Review Benchmark (50 real PRs), a **37% relative lift** over Claude Opus 4.6 alone.

RagaXonic | github.com/manaskarra/RagaXonic-DL | *Python, TensorFlow, LSTM, Gradio* Sep. 2024 – Jan. 2025

- Built a 3-layer **LSTM** in TensorFlow to generate polyphonic MIDI blending Hindustani ragas with Western chord progressions; trained on Music21-parsed data with dropout and batch normalization, then shipped a **Gradio** UI with temperature and note-count controls.

GradeScale | github.com/manaskarra/GradeScale-NLP | *Python, Flask, Hugging Face, NLP* Feb. 2024 – Jun. 2024

- Built a Flask essay-grading system scoring seven writing dimensions with Hugging Face models, including all-MiniLM-L6-v2, T5 grammar correction, and domain-tuned coherence/relevance transformers.

Skills

Languages: Python, SQL, JavaScript/TypeScript, Java, C++
ML & AI: PyTorch, TensorFlow, Scikit-learn, XGBoost, Hugging Face, Pandas, NumPy
LLM Systems: LangGraph, Google ADK, MCP, retrieval, tool use, Weaviate, Langfuse evaluation
Data & Infrastructure: FastAPI, Flask, BigQuery, PostgreSQL, Supabase, Docker, Kubernetes, GCP, Git, CI/CD

Education

BITS Pilani Dubai, UAE
B.E. Computer Science • CGPA: 8.0/10 *Sep. 2021 – Jul. 2025*

- **Coursework**: Data Structures & Algorithms, Machine Learning, Deep Learning, NLP, Neural Networks, Computer Networks & Operating Systems
- **Professional Assistant**, Digital Design Lab (Sep. – Dec. 2024): Led Verilog/FPGA lab sessions for second-year students.
